SIARA TECH SOLUTIONS

Recommendation Letter

Mohamed Ismail has been a digital marketing intern at IntoAEC since 1 July 2026 to 31 October 2026. I supervise his work directly and recommend him for a junior Digital Marketing or Performance Marketing role.

His main project was our Meta Ads lead-generation campaign using Instant Forms, split into warm and cold audience ad sets. Mohamed analyses the campaign, tracked leads and cost per lead, and wrote the reports. By 22 October 2026 the campaign had 11 leads. Over its lifetime the warm ad cost ₹842 per lead and the cold ad ₹1,895. The sample is small, but his comparison showed which audience used the budget better.

In analytics, he found that staff visits were distorting our GA4 traffic and added an internal-traffic filter. He also set up a Demo Booking key event, funnel tracking in GA4 and Microsoft Clarity, and a separate GTM container for maec.ai. His backlink and directory work raised our Ubersuggest Domain Authority from 5 to 13 between 10 July and 15 August 2026.

On his own initiative, he built an n8n workflow that collects competitor ads from the Meta Ads Library and groups them by creative angle. He meets deadlines, asks sensible questions, takes feedback well and writes clear reports.

He is early in his career but has a solid base in Google Ads, Meta Ads, GA4 and tracking. I would be happy to work with him again.

Sincerely,

SIARA TECH SOLUTIONS PRIVATE LIMITED CHENNAI 600096
